2012 VACo Achievement Awards

Deadline for Entry: June 1, 2012

Description

The VACo Achievement Awards is a competitive awards program open to local government members of the association. The awards program is held annually to recognize local government programs that exemplify innovation, model practices, partnering or collaboration with other local governments, a private enterprise or state and federal government. Please encourage all county departments to apply!

Eligibility

All local government members of the Virginia Association of Counties, which are in good standing with the association, may participate. There is no limit to the number of applications a county may submit.

All applications must comply with the following standards:

1. The program must have become operational before Jan. 1, 2012, and must be currently operational.
2. Local government officials and/or staff must have played a significant role in developing and implementing the program, with only limited assistance from outside experts and/or consultants.
3. All steps in the application must be completed.
4. Awards will be given to departments or units, not individuals.
5. Programs that have received a previous VACo Achievement Award are ineligible.
6. The program must meet one or more of the criteria outlined below and must be signed by the county administrator or chief administrative official before submission.

Criteria for Selection

The nominated program must meet one or more of the following criteria:

1. Offer an innovative solution to a problem, situation or delivery of services.
2. Promote intergovernmental cooperation and/or cooperation with local, state and federal entities and/or a private enterprise in addressing a problem or situation.
3. Provide a model that other local governments may learn from or implement in their own localities.
4. Programs may be based on programs from another public or private entity but must represent innovative approaches or customization by the local government.

Rules

Rules of entry:

1. All entries must be submitted in duplicate. Mail two copies of each entry bound in a notebook or presentation folder. Include the entry form, all appendices and supplemental materials, photographs, DVD, etc. Additionally, submit one copy in electronic format--PDF or WORD file (e-mail electronic entry to gharter@vaco.org).
2. Entries must be typed and double-spaced. State the problem, challenge or situation faced by the locality and how the program fulfilled the awards criteria (innovation, partnering or collaboration and a model for other localities). Tell how the program was carried out, including financing and staffing, and the program's results. Be concise and submit no more than eight one-sided typed pages plus photos or supporting materials.
3. Include a short overview of the program (no more than one page double-spaced) that can be used as a quick reference guide for judges. Please include the application form.

Judging

Entries will be judged by a three-member panel selected for their expertise in local government. When there are no selected nominations, no award will be made. One entry will be named "Best Achievement."

Award Presentation

Award plaques will be presented at VACo's Annual Business Meeting on Nov. 13, 2012, in Bath County. The winning entries will be featured in a booklet that will be distributed during VACo's Annual Conference, and winners will receive a special ribbon to be worn on their nametags. Winners will be recognized on the VACo website and in a news release sent to statewide media. A VACo staff member also attends Board of Supervisors meetings to present an award.

Deadline

All entries must be postmarked no later than June 1, 2012, and mailed to VACo Achievement Awards, 1207 East Main St., Suite 300, Richmond, Va., 23219-3627. Entries will not be returned.

Historical County Data Book Henrico County, Virginia

The Historical County Data Book is an innovative, cumulative collection of historical data presenting statistics from as far back as 1610 for Virginia and 1790 for Henrico through present day. This data shows how and when Henrico County developed. This is a first-ever compilation of historical Henrico County data brought together in one location. County departments and State agencies contributed historical information which evolved into an arrangement of eight categorical sections consisting of 48 tables of meaningful facts that include footnotes and references. The Data Book is available on the main county website for easy accessibility by county residents and the general public, with annual updates each calendar year. Since being published online, the Historical County Data Book has achieved worldwide viewing status on multiple forms of electronic devices which will grow as technology advances.

The Data Book was created through a request from the 2011 Commemoration Advisory Commission, due to the county's upcoming 400th anniversary in 2011, which sought to collect historical information back to 1611 when Henrico was originally settled. Since 1634, ten counties and three cities were formed out of the original Henrico Shire, now Henrico County. The historical facts and figures about Henrico County that have been kept in separate databases, old reports and files have been dusted off and transformed into meaningful tables of information. The Historical County Data Book will be a legacy known for its informative and educational content for many years to come, and a distinguished model for other localities to follow who wish to publish their historical information.

Historical County Data Book Henrico County, Virginia

The Problem

Prior to the Historical County Data Book creation, there was no central collection of useful data on Henrico County to share with its residents and the general public in one medium. While each county department prepared their own reports for local and state submission, a centralized location to review data from various aspects of the county did not exist. Based on the request from the 2011 Commemoration Advisory Commission in January 2009, the project's objective was to collect a variety of historical county data and arrange it into a meaningful, understandable, and viewable layout for public information.

The Data Book would serve as a collection of pertinent, past and present, numerical data presented in an easily accessible and understandable format. The intent was to capture data from the beginning of Henrico in 1611 through present day. After researching the feasibility of this project and learning how other localities and states arranged their historical information, it was found that only current, with some past data, could be located. However, data from the first beginnings of a locality or state were not offered. This finding is the difference that makes Henrico County's Data Book stand out from the others and have historical significance.

The research also led to the topic of how to store and offer the Data Book to Henrico's employees, residents and general public. Publishing the Data Book in a bound form would lead to extensive yearly maintenance costs. Yet, publishing the Data Book in an online format would result in little cost, if any, and offer real-time information.

An online release would allow easy access by any computer with an internet connection. The decision was easily made to permanently place the Data Book on the main county website. As a tie-in to the 400th anniversary commemoration, a link from the Data Book would be placed on the County's 400th anniversary website during calendar year 2011 with a description and a link to the main county website. The link to the Data Book page would also be placed on the Henrico County Public Schools website.

Description of the Program

The inspiration to create a Historical Data Book was intended to capture past and present data since a Data Book did not exist for Henrico County. The idea was to include relevant historical data on a year by year basis leading up to present day, and provide annual updates to the prior year's information. The Data Book would also reside on the county's main website under the section of "About Henrico."

The 2011 Commemoration Advisory Commission formally requested the Historical Data Book creation in January 2009 as part of its anniversary objectives. The first objective for the Data Book was to provide meaningful information to educate citizens about Henrico County. The second objective was to compile history from when Henrico was first settled through present day, strictly in the form of data, to show how the county has progressed over time. Lastly, to obtain historical information in the cumulative collection, the third objective included partnering with external agencies within the Commonwealth of Virginia to gather historical information.

With the idea set, the next step involved what content to include. An initial list was drafted based on topic and county department or state agency responsibility.

When beginning to research possible data topics, a thorough search was conducted online to see how other localities or States displayed their statistical information. It was found that other data books included a variety of departmental information and that information existed in a narrative format which referred to maps, illustrations, and tables of data. However, most did not include straight data or historical information older than the 1950's. This would become Henrico's mission: to create a Data Book that represented only data and reached back into our wealth of history to find information from centuries ago.

Once the list of topics was finalized in mid-2009 and it was determined which departments those topics fell under, letters were sent to internal department directors summarizing the request for the Historical Data Book by the 2011 Commemoration Advisory Commission. Similar letters were sent to external state agency directors, that Henrico County partners with, to obtain data kept in their organizations. Each letter asked that the directors appoint a contact person to research and submit historical to present day data to the Data Book project manager. Suggestions of statistical information were offered to assist with their contribution; however, each department or agency had the flexibility to provide meaningful and useful information for the Data Book based on data included in their own annual reports. The consideration was to not create an additional report for the agencies to submit annually as they have many mandated reports that they must update each year. Therefore, by allowing agencies to submit relevant information to the Data Book enabled their participation.

The department contacts were asked to submit their 2009 data by January 2010 using a Microsoft Excel spreadsheet. Since an Excel spreadsheet template would later

be designed by the project manager to use for all of the tables, receiving the data in a basic format would be easier to transfer into the template. As the agencies began submitting their data, the information was reviewed to ensure that it would be easily understood by a novice reader.

The Data Book was placed online for easy access by all viewers. While the agencies were submitting their information, the online Data Book creation began. Eight categorical sections were formed based on the grouping of the requested information which began to take the shape of a Table of Contents. Each data set of requested information would become a table listed under an appropriate section.

The main template for the Tables was set up with the calendar years along the y-axis, or row name, and the field name across the top of the x-axis, or column heading. In some cases, the years and field names were swapped if it was the simplest way to layout the data.

Because of the importance of citing sources, the contributors were asked to include reference information from where the data was found including the year of a publication or an annual report. In instances where agencies had entered historical data into their current databases, the department name was listed as the reference. The reference citing the source was placed at the bottom of each Table. Footnotes were also used to designate a change in data, i.e. the method to collect data in recent years differed from prior years or a change in a department's responsibility for collecting specific information.

Use of Technology

The Data Book was chosen to be placed online instead of in a printed form to enable the public to have immediate access to up-to-date information. The County's Webmaster created a webpage on the main County's website for the Data Book to permanently reside: <http://www.co.henrico.va.us/about-henrico/historical-databook.html>. During 2011, the Data Book was described and had a link from the 400th anniversary website back to the main county website.

The County website welcomes the Data Book as it lists other web pages related to Henrico's history. An overview of the Historical Data Book is provided for viewers to have an understanding of what kind of information they would find and how to access each file. While the data is kept in an Excel spreadsheet, each spreadsheet was converted into a Portable Document File (PDF) for easier online viewing. The online PDF files can be viewed on a computer and printed on standard letter-size paper. Each Section has its own designated color coding, as a way to enhance a basic spreadsheet filled with numeric facts. Lastly, each Section was assigned a picture to portray what information is represented in the Tables. Most pictures used were from the collection kept by Public Relations and Media Services; however, one picture was donated for use, with written permission, by a local community college to represent Education.

The Cost

The Historical Data Book achieved a \$0 cost for the creation, research, and final online debut of the project. The numerous hours spent on behalf of the county staff and state agencies which contributed to their historical information are significant and

recognized as this project became a priority to add to their daily responsibilities. The project manager who oversaw the development of an idea into tangible spreadsheets containing noteworthy data spent great amounts of effort to bring this project to life. The County's Webmaster added this webpage to the main internet site as part of increasing County information in the expanding electronic age. In addition to being a zero cost project, it was agreed upon by the 2011 Commemoration Advisory Commission that the Data Book would become a legacy project assigned to the Planning Department to be updated annually. The request submittal has already been sent by their staff to continue this worthwhile public information project.

The Results

The Historical Data Book has received positive acclamation from contributors, general readers, and the 2011 Commemoration Advisory Committee who requested the creation of this project. By July 2010, sixteen internal departments and five external state agencies spent countless hours researching databases, annual and departmental reports, and combing through old files to gather historical data from centuries ago (Appendix 1). The Historical County Data Book proudly features eight Sections and 48 Tables dating back to 1610 through 2010 (Appendix 2). 2011 data is currently being collected. Numerous hours were then spent formatting the data into a comprehensible layout easily understood by general readers.

When the Data Book obtained its online publishing in July 2010, it was formally presented to the 2011 Commemoration Advisory Commission, the Henrico County Manager, Department Directors, and the Henrico County Board of Supervisors with a

demonstration of how to view online. The state external agencies were sent an email with the link to the Data Book's webpage so that they could see the outcome of their hard work. The contributors were greatly surprised to learn so much about their departments along the way and how this data related to Henrico's early years.

In the first six months of the Historical County Data Book's unveiling on the county website, the web page received almost one thousand hits and the average time spent on the page was 1:59 minutes. Through internet tracking capabilities, the Data Book has been viewed on computers as well as electronic Tablets and Smartphones. Specifically, twenty-one iPad's, three Apple iPhone's, and seven Android phones have kept viewers attention for up to 27 minutes. The Historical County Data Book has also reached global viewing status with 14 views from Europe.

Through the collaborative effort of 16 county departments and 5 state agency contributors, the Historical County Data Book presents a memorable review of statistical facts and figures from 1790 to present day. Henrico County is proud to have a first-of-its-kind Historical County Data Book to educate and share with the general public. The Historical County Data Book can be used as a model for other localities who wish to preserve historical data from their earliest beginnings.

HENRICO COUNTY VIRGINIA

Historical Data Book

The Henrico County, Virginia Historical Data Book is a cumulative collection of historical data representing statistics as far back as 1790 through most recent, 2010, and will continue to grow annually. Each section provides a brief description and a listing of tables; footnotes and source detail are listed at the bottom of the page for each table.

Historical and current data has been researched and collected within County departments and outside agencies from an assortment of published and departmental reports. We offer our appreciation to the contributors for their time and effort put forth thus far and in the future.

Please click on the link after the description of the section which will take you to a PDF file. In the file, scroll down (with arrow keys or Page Up / Page Down keys) to view pages 2, 3, etc. of the file. (1) For the Censuses prior to 1990, Race was not broken down by Hispanic Origin so there is an overlap/double-count between those indicating Spanish Origin and those reporting their race.

(2) Race categories prior to the 1980 Census were classified differently

Only college credit classes included. Headcounts for one academic year are unduplicated within that year. Headcounts across multiple years may be duplicated (e.g., a student may have enrolled in multiple academic years).

(1) An academic year includes the summer, fall, and spring semesters (e.g., academic year 2008-09 included summer 2008, fall 2008, spring 2009).

(2) Students took at least one class at Parham Road campus or Eastern campus; also includes students who took a dual enrollment class taught in Henrico county.

(3) Includes classes associated with all JSRCC campuses (located in Henrico, Richmond, and Goochland; all JSRCC Dual Enrollment Classes; and all JSRCC Distance Learning classes).

(4) Graduate count for one academic year is unduplicated within that year. Graduate counts across multiple years may be duplicated (e.g., a student may have earned awards in multiple academic years).

(5) Awards include Associate Degrees, Certificates, and Career Studies Certificates (CSC). Award count reflects total number of awards granted in the academic year; note: a student may receive more than one award in an academic year.

(1) Due to the availability of the 1990 Census and the creation of new Traffic Zones, new base Land Use by Acres data was created for the 1990 3-C Report using planimeted data from the 400-scale existing land use maps.

(2) Beginning in 2004, all detached condominium units were reclassified as single-family units. The acreage for these developments was added to the single-family total and subtracted from the multi-family total for each affected Traffic Zone.

(3) Due to a boundary shift with Goochland County, Henrico County gained 37.58 acres in 2006.

(4) A Mixed Use Category was added to the annual 3-C Reports beginning in 2009.

"See You on the Big One!" A History of the Henrico County Division of Fire by Walter C. Griggs, Jr., September, 1990.

* The Division of Fire did not separate content loss and property loss during these years.

TABLE 7.03 Division of Fire, Chronological History: 1900 to 2010***Prior to the establishment of the Henrico County Division of Fire***

Early 1900's	<p>Fire protection was provided by fire brigades, community hose reels and the City of Richmond.</p> <p>The Ginter Park Community Hose Reel established a Board of Fire Commissioners and built a fire station on Chamberlayne Avenue. This area was annexed by the City of Richmond in 1914.</p>
1920's	A private ownership hose reel located on Libbie Avenue was owned by John Dicks who received calls on his personal telephone and responded from his garage.
1927	The Windsor Farms Community Fire Department was formed with one man on duty 24 hours per day. This formation was used as a marketing tool to sell homes in the community.
February 19, 1930	A subscription service was established with the Royal Fire and Water Service Company to provide fire protection out of a station located on Williamsburg Road. The subscription rates were \$0.50 per month for subscribers and \$50.00 per call for non-subscribers.
September 11, 1930	Station 1 (corresponding with sanitary district 1) was established at Maple Avenue near Patterson Avenue. This station was known as the Westhampton Station and was staffed by 3 paid firefighters and 25 volunteers.
March 1934	The General Assembly provides for the establishment of fire zones within the counties and levying of taxes to support fire departments.
1934	An agreement was reached with the City of Richmond to provide fire protection to portions of the County at a rate of \$50.00 per response for the first hour and \$25.00 for each additional hour.
1936	Taxes were levied in Westhampton, Fulton Hill, and Ginter Park to support firefighting efforts.
July 1941	Station 5 begins operations out of the converted Lakeside Presbyterian Church on Lakeside Avenue.
August 1941	A Sandston-Highland Springs station opened at the intersection of Nine Mile Road and Holly Street.
January 1942	The City of Richmond annexed the Westhampton Station on Maple Avenue. This station became City fire station 19.
September 27, 1943	P. L. Burnett was named as the Acting Chief of all Henrico County fire departments working under the Road Department. At this time, two fire stations were providing all county fire protection with assistance from the City of Richmond in particular areas.
1948	The Glenwood Farms Volunteer Fire Department was organized on Mechanicsville Turnpike.
1949	The Glenwood Farms fire station was annexed into sanitary district 7 and 2 paid firefighters were hired.
October, 1949	The Tuckahoe Fire Department was organized in sanitary district 8. The station was built on Patterson Avenue. *This was the first facility in the county built for use as a fire station.

TABLE 7.03 Division of Fire, Chronological History: 1900 to 2010

1951	P. L. Burnett became the first Fire Chief for Henrico County Fire Department. At that time, there were 13 paid firefighters and approximately 100 volunteers.
1952	The Henrico County Division of Fire was established and removed from the supervision of the Road Department.
<i>After the establishment of the Henrico County Division of Fire</i>	
August 1956	The Eastover Gardens Fire Department opens on Cambrai Avenue as station 16. This station later becomes station 6 and the fire maintenance shop.
1961	The first fire prevention position is established within the Henrico County Division of Fire.
May 19, 1962	Fire Station 10 opened.
July 1, 1962	A County-wide fire department is established abolishing the sanitary districts.
September 14, 1962	One telephone number is established going to Dabbs House to report all fires.
November 1, 1962	R. C. Gilman is appointed as Fire Chief. Chief Burnette becomes the Civil Defense Coordinator.
1964	Fire Stations 4, 7, 9 and 11 are built and staffed.
1969	Fire Station 6 is built on Laburnum Avenue.
1970	Fire Station 1 is built on Carolina Avenue.
1971	Fire Station 2 is built on Darbytown Road.
December 3, 1971	Walter Stickel is appointed as Fire Chief.
1971	Mutual aid agreements are established with neighboring jurisdictions.
1972	Fire Station 12 is built on West End Drive.
